This analysis aims to provide StreamVision with critical and actionable insights for its global expansion in the online streaming industry.

Overall, findings revealed that Netflix achieved its current success through:

- Aggressive & rapid catalog growth
- Increasing diversity of content
- Stronger reliance on movies
- Heavier focus to cater to more mature audiences.
- Catalogue driven by content from the United States, India, and United Kingdom

Ratings
Content Characteristics
Key Insights & Recommendations
Q&A

Key Insights

1. Ability to Aggressively Acquire Content

- Added an average of 500 titles annually. also able to increase diversity of categories alongside this volume.
- Started acquiring older titles in 2010 & 2011 to grow their catalogue, eventually shifting to recent titles. With new competition, they went back to adding old content.
- Most added categories are international movies & international series.

2. Content Tailored to Target Audience

- Catering mostly to mature audiences and those 17+ years old given the top ratings (TV-MA, TV-14, & R)
- Adding content in line with vacation, especially in June & December

3. Skewed Content Sourcing & Regional Saturation

- American content dominates the catalog of Netflix
- Other markets seem underrepresented
- In Asia, other top countries (Japan & South Korea) show heavier reliance on TV Shows than Movies

Recommendations

1. Explore Content Preferences Further

- Look into potential to gain more share over TV Shows, providing more of this content type, especially from Asian countries such as Japan & Korea.
- Conduct further exploration on categories, without dividing by TV Shows and Movies, so there can be a better understanding of relationships and distributions.
- Also gather data for removed dates, so there is more accuracy in looking at the current catalogue.
- Consider building a catalogue less reliant on content from the United States.

2. Expand through Targeted Regional Opportunities

- Consider expanding and strengthening presence in other regions such as South America, Africa, and Australia, but don't neglect the key markets.

3. Apply Diverse and Focused Marketing

- Align content acquisition and releases to seasons, holidays, cultural events to attract customers. (for example, add new releases of romantic films in February and children-related titles in June during summer vacation)
- Cater to diverse groups and also consider the mature audience.
